

**IN THE ABSTRACT**

Please rewrite the abstract as shown below.

**RESISTIVE POLYSILICON ELEMENT CONTROLLABLE TO  
IRREVERSIBLY DECREASE ITS VALUE**

**ABSTRACT**

A resistive element controllable to irreversibly decrease its value, ~~comprising:~~  
including several polysilicon resistors ~~associated~~ connected in series between two  
input/output terminals of the resistive ~~element~~ element; and an assembly of switches,  
connected to turn the series ~~association~~ connection into a parallel association of said resistors  
between two programming terminals intended to receive a supply voltage.
